S E R I E S

ALL THREAD FIBERGLASS FORM TIES

DESCRIPTION

The 800 Series form tie is our newest member of the Sigma Tie forming lineup. It was developed for medium duty applications to give similar performance to the workhorse of the forming world, the 15mm Euro Rod (Dywidag Rod). Not all forming Systems are designed to accept ties greater in diameter than 1" (25mm) and our new 800 Series is perfect for these demanding applications.

800 SERIES USES

These ties provide the same great benefits as all our other fiberglass form ties when used in:

- Large mat foundations
- Formliner Applications
- Battered Walls
- Thick Abutments/she bolt replacement
- No patching unlike taper ties and she bolts
- Custom width walls (columns)
- Water/wastewater systems with hydrophilic waterstops
- Corrosion Resistant Applications

SAFE WORKING LOADS (2:1)

Standard Nut: 18,000 lbs
Swivel Wing Nut: 18,000 lbs

15' Standard lengths
0.800" Diameter
